### Special Features

- Double Gate opens for the vehicle.
- 1 side opens to let the pedestrian pass.(opening angle can be stop half way).
- Before the gate reaching to the end, motor speed will slow down to prevent the gate noise & strong impact.
- The motor will automatically stop when hit some object, mean time the siren will alert, and the gate will reverse few inches and auto close back for your safety.
- When the gate is not close tightly or someone try to force open more than 0.5 inch from the stopper, siren will trigger for few second to noticed you. (sensor type : conceal magnetic contact to prevent false alarm).
- Built in Panic Button on remote control, by pressing the button, you can trigger the siren and summon help immediately.
- With the backup battery, the gate can continue operating without interruption during a power break. (when operating with battery, the siren will give signal to noticed you).
- Special Structure design : weather & thunder resistance. (the motor design is inside the arm to prevent ordinary problem).

### Model

J 9

### Specifications

Power Supply (v)	230 AC
Motor Voltage	12V DC
Motor Speed	6000 RPM
Dual Speed	Yes
Opening Time (90')	± 12 sec
Max. Gate Weight	400 kgs
Max. Swing Angle	110'
Max/Min. Gate Length	3 - 24 feet
Temperature (°c)	-20 / +60
Remote Controller	4 channels UHF
Backup Battery	12 DC 7AH
Acutuator	screw driver type
Arm Dimension (mm)	690(L) 60(W) 63(H)
